**SECRET**

18 December 1975

MEMORANDUM FOR: Office of General Counsel

ATTENTION : [REDACTED]  
Associate General Counsel

SUBJECT : U.S. v. IBM (69 CIV 200 S.D.N.Y.) - Justice  
Department Request for Release of CIA Document  
to IBM

REFERENCE : OGC Memorandum to DCD dated 26 November 1975,  
Same Subject

1. Referent requests this division's approval for the Department of Justice to release a document entitled "Status of Computer Developments in the USSR and Eastern Europe," to IBM for use in pending antitrust litigation.

2. The document in question was not produced by DCD and thus I cannot advise you on whether or not it should be released. In our attempts to identify the document, we consulted with the Office of Scientific Intelligence [REDACTED] who stated that it is not CIA finished intelligence but may be CIA analysis assembled in response to a request by a US Government official. According to [REDACTED] the information in the document is probably no longer classified since it was prepared in 1969 and the information contained in it has since appeared in open literature.
